Seminole Ranger District		Florida Interagency Coordination Center (FL-FIC)
Wakulla Ranger District		Florida Interagency Coordination Center (FL-FIC)

Description

The Organization module contains information about the agencies, government offices, dispatch centers, and vendors that play a part in resource ordering and status.

Within ROSS, dispatch centers and other government offices are created in a top-down fashion that mirrors the hierarchy that exists within agencies and between dispatch offices. Given this structure, resources can then be tied both to the government office that provides them and the dispatch office that serves them (*see Resource Item module information*). The hierarchical arrangement allows resource orders to be correctly placed up or down within ROSS and the creation of reports to answer very specific questions.

At each ROSS dispatch office, users with Data Administrator privileges enter and maintain the Organization information pertinent to that office.

ROSS Module Summary

Organization

The Organization module is related to the Person, Resource Item, Resource Status, Contract, Reports and Personal Settings modules as well as the components of the ROSS Dispatch module.

Data Information:

Data Element	Data Definition
Name	The title given to an organization (agency, government office, dispatching entity, or private vendor) that is of interest to the dispatch community.
Unit Code or Unit ID	A unique designator for a resource provider or dispatch center that is a combination of the appropriate two-letter State postal code followed by a three or four letter identifier (e.g., FL-FIC, FL-EVP).
Organization Type	Each organization has a principle role (or type). These include Agency, Dispatch Center (national, geographic or local level), Cache (national or local), Government (Non-Dispatch), Non-Government, and Vendor.
Location	The coordinate data of an organization (UTM, latitude/longitude and PLSS). Does not apply to agencies. When the ROSS map function is implemented, Organizations may be graphically displayed.
Political Unit	The government level of an agency organization (city, county, state, national).
Time Zone	The time zone that encompasses the location of a dispatch center.
Subordinate Organizations	The government units or dispatch centers that report up to a given Government (non-Dispatch) or Dispatch organization, respectively (e.g., Arches National Park reports to Intermountain Region NPS; Helena Dispatch Center reports to Northern Rockies Coordination Center).
Organization Specific Data	Other attributes which, depending on organization type, may include Addresses, Frequencies, Contacts, Financial Codes, Location, Reload Bases, and whether the organization can be an Incident Host.
