

ROSS Module Summary

Person

The screenshot shows the 'Person' module in the Resource Ordering and Status System (ROSS). The interface includes a menu bar (File, Administration, Resource, Status, Window, Help), a toolbar with navigation icons, and a user information bar (User: \$NCNCC_ADMIN @ NC-NCC). The main area is divided into two sections: 'Search Results' and 'Person Details'.

Description

The Person module displays basic information pertaining to individuals entered into ROSS. This includes name, providing organization, e-mail address, the record source and whether or not the person is an overhead resource. Phone, fax and pager contact information may also be entered.

This screen is the initial entry point for people records stored in the ROSS database. Information may be hand-entered or imported from an agency qualifications system. Imported records are indicated by the system of record (REDCARD, SACS or IQS).

A Person record must be created for an individual before entering their qualifications, giving them a ROSS user account or stusing them.

ROSS Module Summary

Person

ROSS users with Data Administrator privileges have access to enter and maintain the information in the Person module. Qualifications Import Managers may perform periodic imports to this module.

This module is directly related to the Organization, Resource Item, Resource Status and Web/Phone Status modules.

Data Information:

Data Element	Data Definition
Person Name	A word or combination of words by which a person is known.
E-Mail	Individual's electronic address.
Provider Unit	The Government (Non-Dispatch) organization identified as providing the resource (e.g., National Forests in North Carolina).
Link/Unlink	Links (or unlinks) a person record to an organization. Used to move an individual's ROSS record (i.e., when they transfer).
Overhead Resource	A designator that identifies the person as a resource item (with one or more qualifications) that is stasured in ROSS
Record Source	Identifies the system of record for imported data (REDCARD, IQS, or SACS). Hand-entered records are identified as ROSS.
Contact Method	Phone, fax or pager information that may be used to contact the individual.
