

ROSS Module Summary

Resource Status

The screenshot shows the 'Resource Status' window in the Resource Ordering and Status System (ROSS). The window title is 'Resource Ordering and Status System (ROSS)'. The user is identified as 'User: SROUSSOPOULOS @ NC-NCC'. The interface includes several filter sections:

- Select Filter For Resources:**
 - Select Resource Type:** Radio buttons for Aircraft, Crew, Equipment (selected), Overhead, and Supply.
 - Select Status To View:** Two dropdown menus, both set to 'All'.
 - Select Provider:** Dropdown menu set to 'All'.
 - Select Owner:** Dropdown menu set to 'All'.
 - Select Incident:** Dropdown menu set to 'All'.
- Set Resource Status:**
 - Select Status:** Dropdown menu set to 'Available'.
 - Select Area:** Dropdown menu set to 'GACC'.
 - Display:** Dropdown menu set to 'Provider'.
 - Buttons: 'Set Availability +', 'Set 'Available To' +', and 'Edit Unavailability Periods'.

The main area contains a table of resources:

Resource Name	Provider	Status	Available To	Location
BUS - COACH - Emma	NC-NCF	Available	Local	North Carolina Interagency Coordination Center
ENGINE - 101	NC-NCF	Available	Local	Uwharrie
ENGINE - 111	NC-NCF	Available	Local	Wayah
ENGINE - 21	NC-NCF	Available	Local	Cheoah
ENGINE - 31	NC-NCF	Available	Local	Croatan
ENGINE - 32	NC-NCF	Available	Local	Croatan
ENGINE - 51	NC-NCF	Available	Local	Grandfather
ENGINE - 61	NC-NCF	Available	Local	Highlands
ENGINE - 71	NC-NCF	Available	Local	Pisgah
ENGINE - 81	NC-NCF	Available	Local	Appalachian
ENGINE - 82	NC-NCF	Available	Local	Hot Springs
ENGINE - 91	NC-NCF	Available	Local	Tusquitee
TRACTOR/PLOW - Holder - 1546	NC-NCF	Available	Local	Cheoah
TRACTOR/PLOW - Holder - 2317	NC-NCF	Available	Local	Cheoah
TRACTOR/PLOW - T&Y - 0099	NC-NCF	Available	Local	National Forests in North Carolina
TRACTOR/PLOW - T&Y - 0339	NC-NCF	Available	Local	National Forests in North Carolina
TRACTOR/PLOW - T&Y - 2003	NC-NCF	Available	Local	National Forests in North Carolina

At the bottom left, there is a 'Clear Search' button. At the bottom right, there is a search button with a magnifying glass icon.

Description

Dispatch centers use the Resource Status module to view and maintain the status of the resources they dispatch, including pre-positioned resources.

The module allows a dispatch center to update the status of unassigned resources to available or unavailable and to set the area of availability to local, GACC or national. Unavailability periods may be created or edited. The search function can be used to find a resource by name or to display resources that have a given qualification or classification, e.g., DIVS or Type 6 Engine.

To facilitate statusing of unassigned resources ROSS offers the user with many filtering options. The only required filter is resource type (e.g., aircraft, crews, equipment). Additional filters include resource owner, provider, and current status. The filtered resources may be displayed by provider, home unit or owner. Dispatchers may set the status and the area of availability of one or more resources at a time.

ROSS Module Summary

Resource Status

Filtering by incident and a status to view of 'assigned' allows Dispatchers to quickly determine the location and status of resources on incidents. Very specific questions can be answered such as which assigned overhead resources have a status of tentative release, released or demob in route. When the ETA of a released resource has passed, ROSS sets the status to Returned from Assignment.

ROSS users with the role of Dispatcher or Status Only Dispatch utilize this module to view and update resource status. Basic Users can view status information via the Reports module.

This module is related to Web Status, Phone Status, Organization, Resource Item, Person, Pending Request, Request Status, and Reports.

Data Information:

Data Element	Data Definition
Resource Type	The ROSS catalog group (e.g., aircraft, crews, equipment). This is a mandatory filter in the Resource Status module.
Select Provider	A filter for an organization that provides resources (e.g., TN-CNF). The 'CWN' option filters for contracted resources. Default is 'All'.
Select Owner	A filter for the current dispatch center's vendor-owned resources. Default is 'All'.
Select Incident	A filter for the current dispatch center's resources that are assigned to a particular incident. Default is 'All'.
Status to View	A filter that displays the current dispatch center's resources that match the selected value (e.g., Available). The choice of 'Assigned' includes additional filters (e.g., mob in route, at incident, tentative release).
Set Resource Status	Used to set status of one or more resources to Available or Unavailable (with a reason) and to set the area of availability (local, GACC or national) of one or more resources.
Unavailability Period	A user-created date range when ROSS will set the resource status to 'Unavailable'. A reason may be selected (e.g., vacation).
