## Description

The Selection Area module is used to manage selection areas for a dispatch center’s immediate subordinate centers. For example, NICC maintains selection areas for the GACCs, and each GACC maintains selection areas for their subordinate dispatch centers. Dispatch centers are not permitted to set their own selection area.

A Selection Area defines the placement authority between selected dispatch offices, coordination centers, and NICC. Organizations within the selection area can order resources directly with other organizations within the selection area, without enlisting normal dispatch centers.

This module is closely related to the Pending Requests module.

# ROSS Module Summary

## Selection Area

### Data Information

Data Element	Data Definition
Set selection Area for	The placement authority of the selected subordinate dispatch center with other dispatch centers, coordination centers, and NICC.
Set Filter criteria for Ordering Authorizations	Allows the user to filter for the selected subordinate dispatch center's ordering authorizations by Catalog, Category, and/or Catalog Item.
Catalog	Ordering authorizations may be filtered by the Aircraft, Crews, or Equipment catalogs. The default is "ALL."
Category	Ordering authorizations may be filtered by the Category of a selected Catalog. The default is "ALL."
Catalog Item	Ordering authorizations may be filtered by the Catalog Item of a selected Catalog and Category. The default is "ALL."
Ordering Authorization for Selected Dispatch Center	The currently defined organizations that have placement authority for the selected subordinate dispatch center.
Organization Name	The name of the organization in the subordinate dispatch center's selection area for the subordinate dispatch center.
Active <i>check box</i>	Turns the selection area dispatch on or off.
Placed Down requests <i>check box</i>	If selected, this check box allows requests that were placed down to the dispatch center to then be placed to a subordinate area dispatch. <i>This is not common.</i>
SA Placed requests <i>check box</i>	If selected, this check box allows requests received from any other selection area to then be placed to another selection area dispatch. <i>This is not common.</i>
Place Up Authorization <i>check box</i>	If selected, this check box allows requests placed to the selection area dispatch to then be placed up. <i>This is not common.</i>
