

NAP Version 1.3.1/OIS Version 1.3.1 Release Notes

This is a synopsis of the changes included in the deployment of NAP 1.3.1 and OIS 1.3.1 which will occur as a combined deployment. The primary objective of both NAP version 1.3.1 and OIS version 1.3.1 is to provide consistency and fix minor defects to the user interface. The NAP changes will be the most pertinent to the general user.

Installation

No user actions required.

New or Changed Functionality

Account Manager screen has been modified to reflect the changes listed below.

Change Requests and Defects Fixed in this Version

- **NAP**

- For User Accounts: Display column order consistently and add Header to first NAP login page.
- For Account Manager role: refresh record grids automatically, remove display of removed accounts on grid, fix required field missing error options, update Last Name display after editing, and correct display on grid search on username.
- Fixed issues with Application Management: Display newly added applications in drop down list and display three portlets evenly across window.

- **OIS**

- Fixed the display of User Account column order for consistency.
- For Organization: Added Header, fixed required field error message consistency, fixed intermittent errors when merging/unmerging, fixed duplicate subdivision structure display after removal of parent, fixed display of contact extension box on Telephone contact method, fixed issue with international addresses when states are greater than 3 characters or there is no state, fixed cut-off of custodian error message.
- Fixed alignment of label and subdivision name and display of complete email address regardless of size of Organization name.
- Fixed alphabetical sort regardless of letter case.
- Fixed usability issues in Organization Management: cluttered text in grid view, cursor in search box when toggling between chart and grid view, scroll down function in grid view, incorrect display of dates, and maintaining filter criteria after editing in super grid.
- Fixed progress indicator on decommissioning/re-commissioning an organizational unit, fixed alignment of new assignment justification text and fixed unexpected error on search for political unit.
